

# Zens 3-in-1 magnetic wireless charger

**Charge your iPhone 12 and up in landscape or portrait mode and charge your AirPods at the same time. This charger is equipped with a 27W USB-C output that allows you to fast charge your iPad or even your MacBook Air.**

## Product description

3-in-1 magnetic wireless charger has enough power to charge 3 devices simultaneously. The magnetic holder charges an iPhone 12 or up in landscape or portrait mode. The base of the charger is a wireless charging area on which you can charge your (wirelessly rechargeable) AirPods or any other Qi device. The right side of the base has an integrated 27W USB-C Power Delivery port. Via this port you can easily charge your iPad or even a MacBook Air.

Please note that a power adapter is not included. To charge an iPhone, AirPods, iPad or MacBook Air simultaneously, we recommend an USB-C 60W PD adapter. If you would only like to charge your iPhone and AirPods an USB-C 18W charger is sufficient.

## Features

- Charges MagSafe (iPhone 12 and up) compatible iPhone, AirPods and an iPad or MacBook Air simultaneously
- Magnetic charger: 10W wireless output
- Charging pad: 5W wireless output
- Built-in USB-C port to charge a third device at 27W
- Magnetic holder can charge a device in both landscape and portrait mode
- Aluminium design
