

SCHOOLMATE PLAIN/GRIDDED DRYWIPE FRAMELESS LAPBOARDS

Frameless double-sided boards

DESCRIPTION

The Frameless Laptop Non Magnetic Mini Whiteboard is an excellent educational tool for students. With the double writing area, it can be used to take notes, write, and draw. Plain on one side, gridded on the other, to meet pupils' specific needs. Grids help to draw charts and diagrams and to complete math exercises. This A4 whiteboard is a great alternative to verbally answering a question and as a voting tool. Besides ensuring active participation, it encourages the ones who may be too shy to put their hand up to answer a question, building their confidence. Thanks to the dry wipe surfaces, it's ok to try and make mistakes, as they can wipe the board clean and just start again. Its frameless round edges and corners make this lightweight yet resistant portable board a safe and engaging method for students to learn.
