- Height: 3.7 CM
- Width: 10 CM

Color i-Type Film

-
- Modern film for modern instant cameras. 8 instant photographs to bring your moment to life in dreamy Polaroid color and finished in that iconic white frame. This color i-Type film is compatible with the Polaroid Now, Polaroid Now+, the Polaroid Lab and more*. It's battery-free so it won't work for vintage cameras, but it will work for your budget.

The original format

8 instant photographs in that original Polaroid square format and finished in a white frame.

Battery-free film

Our i-Type cameras come with a rechargeable battery, so unlike our 600 film, this film doesn't include a battery.

Develops in 15 minutes

Watch one of the most complex chemical processes in the world bring your moment to life.

Product features

- **Store chilled, shoot warm**
Temperature affects how the film works. Keep it stored cold in the fridge, but never freeze it. Ideally you should let it adjust to room temperature before you use it. That's around 55 - 82°F (13 - 28°C). When it's cold out, keep your photos warm in a pocket close to your body while they develop. Or if it's a hot day, make sure they stay cool.
- **Shoot with the light**
The more light in your shot, the better your photo will turn out. Instant film loves light, especially natural light. Use the flash for all your indoor photos.
- **Develop in the dark**
All photos appear blank at first. They're most sensitive during this time, so don't bend or shake them. Shield them from the light, and place them face down as they develop. Keep B&W photos shielded from light for about 1 minute, and colour film for about 6 minutes.
- **Care for your camera**
Your camera has a set of rollers inside the film door. Each photo passes through these rollers as it's made, so it's important to make sure that they stay clean. If the rollers get visibly dirty then gently wipe them down with a soft, damp cloth.

Technical specification
